## INTRODUCTION

Revision of the ACDB forms used to collect the data were made in early 1987. The primary purpose of the revision was to make the forms easier to fill out and modify procedure and diagnosis menus. The new forms went into production on May 1, 1987 and data collected during this period was called Phase 2. While many fields on the forms remained the same, some fields were eliminated while other fields were added. This manual describes the layout and definitions of the fields used on the forms in Phase 2. See Ambulatory Care Data Base ACDB) Dictionary, Sequential Files of Phase 1 for Phase 1 field descriptions.

Financial support for the ACDB study was discontinued shortly after Phase 2 collection began. As a result, some sites ceased collecting the data after two months while one site continued collecting data for five months. Patient and Provider demographic data were collected separately from the visit data and was incomplete because of the study shut down.

The Ambulatory Care Data Base (ACDB) was originally structured in a hierarchical data base called FOCUS. The data were restructured into sequential files where each record contained encounter data, patient data and provider data for a single patient visit. There were two types of forms used in collecting the data, long forms and short forms. Short forms were designed to collect information on groups and various procedures such as immunizations. The short forms contained an abbreviated list of fields and often did not include time nor diagnosis. The data described in this manual was taken from the long forms. There was a total of 305,148 visits collected on long forms. Of these, 191,579 records have both patient and demographic information available. 8290 records have neither patient nor provider information.

The number of visits by site are BAMC, 49873; Ft. Bragg, 20355; Ft. Campbell, 81228; Ft. Jackson, 41916; Ft. Polk, 99548; and Redstone Arsenal, 12228.

Two appendices (B and C) provide listings of the diagnosis and procedure code descriptions. These listings are taken from the diagnoses and procedures found on the forms that were used to record each encounter. A provider could have written in codes that were not on the form and therefore would not appear in the appendices. Descriptions for codes which were written-in may be found in International Classification of Diseases, 9th Revision, Clinical Modification Publication or a Physicians' Procedural Terminology, Fourth Edition.

CODES                      BATTALION AID FLIGHT MEDICAL STATIONS

SCAA 4/12 CAV (FT POLK)

The codes described in this appendix were collected from the Phase 2 ACDB. The number of diagnostic codes appearing in the forms exceeds the number on this list because only those diagnostic which were utilized by providers are included. Only codes utilized in the study are included in the appendix. Any code found in the data and not in this appendix are probable errors.

See elements 27 and 28 for use of the codes.

**APPENDIX B.**  
**LISTING OF DIAGNOSIS CODES**

000 NO DIAGNOSIS/REASON FOR VISIT RECORDED BY PRO  
 001 ENTERITIS, CHOLERA  
 0020 TYPHOID FEVER  
 0030 ENTERITIS, SALMONELLA  
 0049 DYSENTERY, BAC/SHIGELLA  
 0058 FOOD POISONING, BACTERIAL  
 0069 AMEBIASIS  
 0070 BALANTIDIASIS  
 0071 GIARDIASIS  
 0078 INTESTINAL DISEASE, OTHER SPEC PROTOZOAL  
 0080 ENTERITIS, E. COLI  
 0088 INTESTINAL DISEASE, OTHER ORGANISM, NEC  
 00881 ENTERITIS, VIRAL  
 00882 DIARRHEA/GASTROENTERITIS  
 009 INFECTION, INTESTINAL, ILL-DEFINED

**APPENDIX C.**  
**LISTING OF PROCEDURE CODES**

The codes described in this appendix were collected from the Phase 2 ACDB. Only codes utilized in the study are included in the appendix. Any code found in the data and not in this appendix are probable errors. The number of procedure codes appearing on the forms exceeds the number on this list because only those codes utilized by providers are included.

See element 29 for use of the codes.
